Summary

Information Technology graduate (GPA 4.77/5.00, First Class Honors, King Abdulaziz University) specializing in Cybersecurity, offensive security, threat intelligence, and SOC operations. Holder of CompTIA Security+ (score: 825) and eJPTv2, with applied knowledge of MITRE ATT&CK, OWASP Top 10, and NCA ECC controls. Built PhishAware — a bilingual AI-powered phishing simulation platform for Saudi Arabia. Seeking entry-level roles in penetration testing, SOC analysis, or cybersecurity consulting.

Education

Bachelor of Information Technology, King Abdulaziz University
Faculty of Computing and Information Technology

2022 – 06/2026
Jeddah, Saudi Arabia

- GPA 4.77 / 5.00 - First Class Honors

Experiences

Internship - Information Technology Department,
Deanship of E-Learning, King Abdulaziz University

06/2025 – 09/2025
Jeddah, Saudi Arabia

- Audited access control policies across 3 university systems, identifying 6 misconfigured user permission entries and escalating findings to senior IT staff for remediation
- Monitored daily system activity logs, reporting 3 suspicious access incidents to the IT security team
- Developed and delivered a cybersecurity awareness guide covering phishing indicators, malware prevention, and safe browsing practices, distributed to 40+ staff across the e-learning department

Skills

Security Core — Penetration Testing, Ethical Hacking, Threat Intelligence, Vulnerability Assessment, SOC Operations, GRC.

Development — Python, Java, JavaScript, HTML/CSS, SQL, PyTorch

Security Tools — Metasploit, Burp Suite, Wireshark, Nmap, Kali Linux, PowerShell

Operations & Networking — GitHub, VS Code, Network Protocols, Firewalls, IDS/IPS

Certifications

- CompTIA Security+ (Score: 825)
- eJPTv2 (Junior Penetration Tester) | eLearnSecurity

Projects

PhishAware | Phishing Simulation & Security Awareness Platform 

- Collaborated effectively with a core development team and academic supervisors to architect a bilingual (Arabic/English) phishing simulation platform tailored for the MENA region's social engineering landscape aligned with NCA ECC Controls and framework.
- Built a custom AI email generation model entirely from scratch utilizing PyTorch and LSTMs to create highly contextual, culturally relevant phishing templates for advanced red-team training scenarios.
- Engineered a real-time awareness dashboard to track employee susceptibility, click rates, and training completion across corporate departments.

Volunteer Experience

Cybersecurity Awareness Month | King Abdulaziz University

Facilitated cybersecurity awareness booths during KAU's Cybersecurity Awareness Month (Oct 2025), engaging 100+ students and staff on topics including phishing, password hygiene, and safe digital practices
